

MOHAMMED FAYIS K

MERN STACK DEVELOPER

Personal Summary

A skilled MERN Stack Developer with hands-on experience in crafting creative solutions. Proficient in designing, developing, and deploying reliable applications to tackle real-world challenges. Committed to continuous learning, improvement, and delivering high-quality work on time.

Work Experience

McAbee Technologies | Full Stack Developer | MAY 2023 - AUGUST 2024

- **Led end-to-end development:** Orchestrated the creation of the **Firstlook** matchmaking application, and directed all aspects of backend design, development, and deployment. Executed the development and delivery of the admin panel, showcasing strong proficiency in full-stack development and adept problem-solving skills within a startup environment.
- **Successfully tackled challenges within a startup setting:** Skillfully addressed obstacles by utilizing research, learning, and teamwork. Adapted to evolving project requirements and resolved technical hurdles to ensure the timely delivery and launch of the Firstlook application.
- **Achieved successful launch and continuous improvement:** Directed the successful launch of Firstlook within six months, surpassing user acquisition goals. Implemented continuous improvements to enhance features, stability, and user experience, driving exponential growth and positive feedback.
- **Utilized AI tools for enhanced development:** Employed advanced AI tools to streamline tasks and overcome technical hurdles. Leveraged AI-driven insights to optimize backend functionalities, enhance user experience, and foster innovation within the team.

Personal Projects

Foundr

<https://www.foundr.site/>

- Foundr is a web application designed to connect entrepreneurs with potential co-founders based on their preferences and interests.
- Implemented the platform's features, including Profile matching, Chat, Articles, and Events.
- This platform's admin side allows hosting events, publishing articles, and user management.
- Collaborated with two other Flutter developers in this project to make a mobile application for users.

Ride

<https://www.livetoride.website/>

- Ride is a feature-rich e-commerce application for purchasing bicycles and accessories.
- Implemented all the necessary e-commerce functionalities like product listing, wishlist, cart, orders, user profile, etc
- Additional features include offers and coupons, user, product, category, banner, order management and more on the Admin side.
